Stakeholder Interview

Competitive Analysis

SWOT Analysis

Stakeholder Interview

- 1. What is the main goal of launching an employment platform for people with disabilities?**
- 2. What is the fundamental problem we are trying to solve currently in the employment market for this group?**
- 3. Why are we launching this project now specifically?**
- 4. How does this project align with the organization's g the organization's goals or societal vision?**
- 5. After one year from launch, what results do you expect to achieve?**
- 6. How will we measure the platforms success?**

Stakeholder Interview

- 7. What are the most important Key Performance Indicators (KPIs) that should be tracked?**
- 8. What is the target employment rate during the first 6-12 months?**
- 9. What indicators show that users trust the platform?**
- 10. What types of disabilities should we consider in the design? (Physical - Visual - Hearing -Intellectual...)**
- 11. What challenges do people with disabilities face when searching for a job currently?**
- 12. Should we initially focus on a specific disability category or all categories?**
- 13. What level of support is required within the platform? (Guidance - Training - Follow-up...)**

Stakeholder Interview

14. What will encourage companies to use the platform and employ people with disabilities?

15. Are there incentives or laws (such as mandatory employment quotas) that the platform should support?

16. How do we ensure companies commitment to a suitable and inclusive work environment?

17. What are the most important features that should be available in the first release (MVP)?

18. What is the feature that the platform cannot be launched without?

19. What features can be postponed to later stages?

Stakeholder Interview

20. What technical, legal, or budget-related constraints should be considered?

21. What is the biggest risk that could threaten the project's success?

22. How can these risks be minimized from the beginning?

SWOT ANALYSIS

STRENGTHS

- Inclusive & accessible platform designed for people with different types of disabilities.
- Direct access to verified job and internship opportunities.
- Opportunities available for beginners, juniors, and experienced professionals..
- Supportive career-based communities for networking and growth
- Skills-focused approach that highlights abilities, not disabilities
- Career enablement through real employment pathways.
- Customized job matching based on education and experience.
- Integrated training programs to enhance skills and employability

WEAKNESSES

- unfamiliar idea for them and the companies
- Hard designing process to work for all of the categories
- Limited market size due to a niche target audience (people with disabilities 10.5% of Egypt's population).
- learning curve for users unfamiliar with assistive technologies
- Many personas

OPPORTUNITIES

- Getting support from the government and the charities
- influence other platforms to adopt similar practices
- Filling the market gap in the middle east
- Opportunities for All levels , offering internships and jobs

THREATS

- it may isolate them even more
- Risk of not fully meeting the diverse needs for all disabled users
- Changes in laws or regulations regarding employment could affect the app
- Funding, challenges in securing enough support to maintain the app
- Market adoption
- low awareness , including their families
