Stakeholder Interview: Goals & Success

1

What is the main goal of launching an employment platform for people with disabilities?

2

What is the fundamental problem we are trying to solve currently in the employment market for this group?

3

Why are we launching this project now specifically?

4

How does this project align with the organization's goals or societal vision?

5

After one year from launch, what results do you expect to achieve?

6

How will we measure the platform's success?

7

What are the most important Key Performance Indicators (KPIs) that should be tracked?

8

What is the target employment rate during the first 6-12 months?

Stakeholder Interview: User Trust & Accessibility

1

What indicators show that users trust the platform?

2

What types of disabilities should we consider in the design? (Physical - Visual - Hearing - Intellectual)

3

What challenges do people with disabilities face when searching for a job currently?

4

Should we initially focus on a specific disability category or all categories?

5

What level of support is required within the platform? (Guidance - Training - Follow-up)

6

What will encourage companies to use the platform and employ people with disabilities?

7

Are there incentives or laws (such as mandatory employment quotas) that the platform should support?

8

How do we ensure companies commitment to a suitable and inclusive work environment?

Stakeholder Interview: MVP & Risk Management

1

What are the most important features that should be available in the first release (MVP)?

2

What is the feature that the platform cannot be launched without?

3

What features can be postponed to later stages?

4

What technical, legal, or budget-related constraints should be considered?

5

What is the biggest risk that could threaten the project's success?

6

How can these risks be minimized from the beginning?

SWOT Analysis

A comprehensive look at the internal and external factors influencing the success of the employment platform for people with disabilities.

1	Strengths - Inclusive & accessible design for various disabilities - Direct access to verified job & internship opportunities - Opportunities for beginners, juniors, and experienced professionals - Supportive career-based communities for networking - Skills-focused approach, highlighting abilities - Career enablement through real employment pathways - Customized job matching based on education & experience - Integrated training programs to enhance skills
2	Weaknesses - Complex design process for diverse disability categories - Niche target audience (10.5% of Egypt's population) - Numerous user personas to accommodate
3	Opportunities - Potential government & charity support - Influence other platforms to adopt inclusive practices - Filling a significant market gap in the Middle East - Provide all-level opportunities, including internships and jobs
4	Threats - Risk of further isolating users - Challenge of meeting diverse needs for all disabled users - Changes in employment laws or regulations - Funding challenges for long-term maintenance - Low market adoption & awareness (users & companies) - Unfamiliar concept for both users and employers - Learning curve for users unfamiliar with assistive technologies
