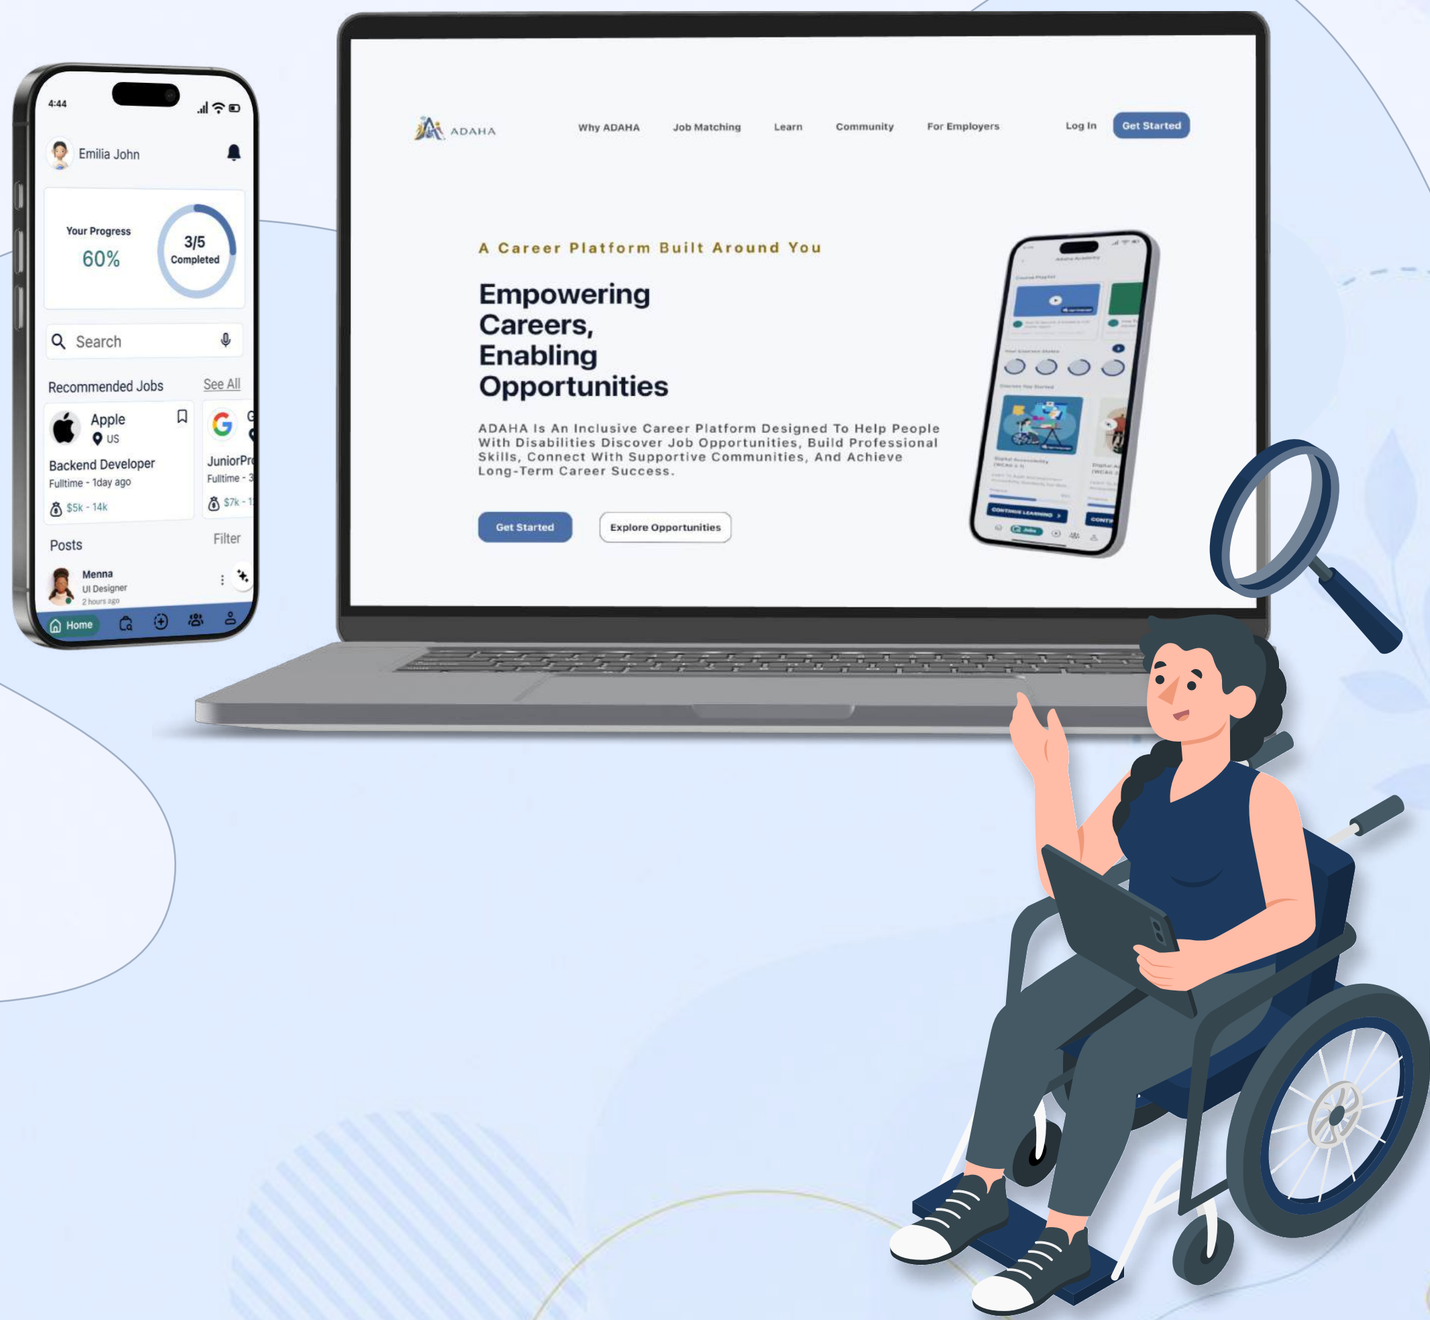
DAHA

Empowering People with
Disabilites Through Employment



Graduation Project 2026

Team ADAHA

UX/UI Design

June 2026

1 Overview

What is ADAHA?

A digital platform that supports people with disabilities by providing accessible employment opportunities, career development resources, and inclusive workplace connections.

What We Do

We connect job seekers with disabilities to employers through job matching, training programs, and accessibility-focused tools.

Main Objective

To reduce employment barriers and create equal opportunities for people with disabilities by facilitating access to suitable jobs and professional growth.

2 The Problem

Millions of people with disabilities face barriers in finding suitable employment opportunities.

Limited Job Opportunities

Many job listings are not designed to accommodate the needs and abilities of people with disabilities.

Accessibility Challenges

Existing employment platforms often lack accessible features, making job searching difficult.

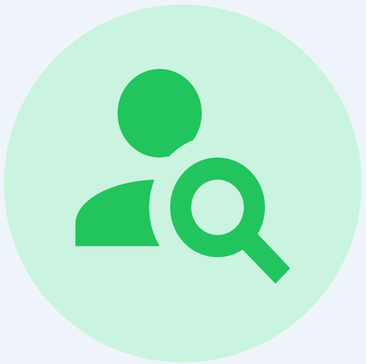
Lack of Employer Awareness

Many employers have limited knowledge about inclusive hiring practices and workplace accommodations.

Impact

These challenges lead to unemployment, underemployment, and reduced career growth opportunities for people with disabilities

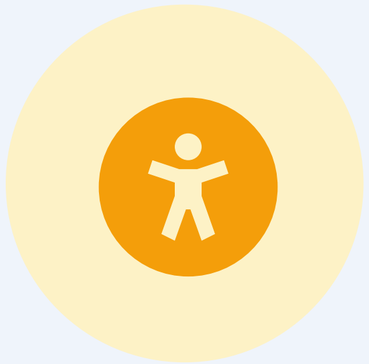
3 Pain Points



Hard to Find Jobs
Limited job listings for people with disabilities.

Complex Processes
Long and confusing application processes.

Accessibility Issues
Websites and tools are not accessible or inclusive.



Lack of Support
No guidance or follow-up after applying.

Employer Bias
Some employers are hesitant to hire people with disabilities.

These pain points lead to frustration, low confidence, and loss of motivation.

4 Project Goals

User Goals →

- Find suitable job opportunities.
- Develop professional skills.
- Gain financial independence.
- Access an inclusive employment environment.

← Business Goals

- Increase employment rates for people with disabilities.
- Support inclusive hiring practices.
- Build partnerships with companies and organizations.
- Create a sustainable employment ecosystem.

Success Metrics ↓

Users	Job Matches	User satisfaction	employers
10K+	**80%**	**85%**	**200+**

5 Target Users

Primary Users
People with Disabilities
(Job Seekers)

- Looking for suitable employment opportunities.
- Want to develop their professional skills.
- Need an accessible and easy-to-use platform.

Secondary Users
Employers & Companies

- Looking to hire qualified talent .
- Want to build inclusive workplaces.
- Need efficient recruitment tools.

6 SWOT Analysis

Highly Inclusive: Accessible design for all disability types.

Direct Access: Direct connection to verified jobs and internships.

All Career Levels: Opportunities for beginners, juniors, and seniors.

Career Communities: Supportive networks for professional growth.

Skills-Focused: Highlights abilities rather than disabilities.

Real Pathways: Enables career growth through actual employment.

Smart Matching: Tailored job matching based on education.

Integrated Training: Specialized programs to boost employability.

New Concept: Unfamiliar idea for both users and companies.

Complex Design: Hard to design for all disability categories.

Niche Market: Limited audience size (10.5% of Egypt's population).

Learning Curve: Difficulty using assistive tech for some users.

Multiple Personas: High diversity in user personas to satisfy.

External Support: Getting backing from government and charities.

Market Influence: Driving other platforms to become inclusive.

Regional Gap: Filling a massive market gap in the Middle East.

Broad Options: Offering internships and jobs for all levels.

Isolation Risk: Potential to inadvertently isolate users more.

Unmet Needs: Risk of failing to satisfy all diverse needs.

Legal Changes: Shifting employment laws could affect the app.

Funding Challenges: Difficulties in securing long-term support.

Market Adoption: Low acceptance or slow adoption rate.

Low Awareness: Lack of awareness among users and families.

Strengths	All-in-one site (Social, Hiring, Training, AI)	Huge global network & social system.	Leading local site with top firm partners.	Great matching on workplace needs.	Top AAA accessibility & high trust.	Global corporate inclusion resources.	Deep expertise in remote placements	Excellent neurodiversity training & hiring.	Strong local workshops & training footprint.	Direct UI, good guidance & job access.	Simple local job search for target groups.
Weaknesses	New platform building market trust	Not tailored for disabilities; low accessibility	Dry commercial site with zero accessibility.	Completely absent from Middle East.	Static job board; no social networking.	B2B focused only; no individual hiring.	Traditional offline model; no app feed.	Highly niche focus; limited global reach.	Manual matching; lacks AI features.	Lacks tracking tools & advanced compliance	Outdated PDF-upload style with zero AI tools.

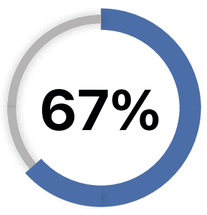
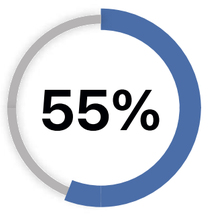
Platform analysis

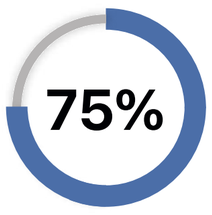
Key Insights



of users find it hard **to find jobs that match** their skills.



need platforms that **are easy to use and accessible.**



lack **professional guidance** and training **opportunities.**

Users need an all-in-one platform that is accessible, supportive and easy to navigate.

Samples Of Research

We conducted interviews and surveys to understand the real needs, experiences , and challenges faced by users.

01 Tell us about a time when the job application process or platform was unclear. How did you handle it, and what did you learn?

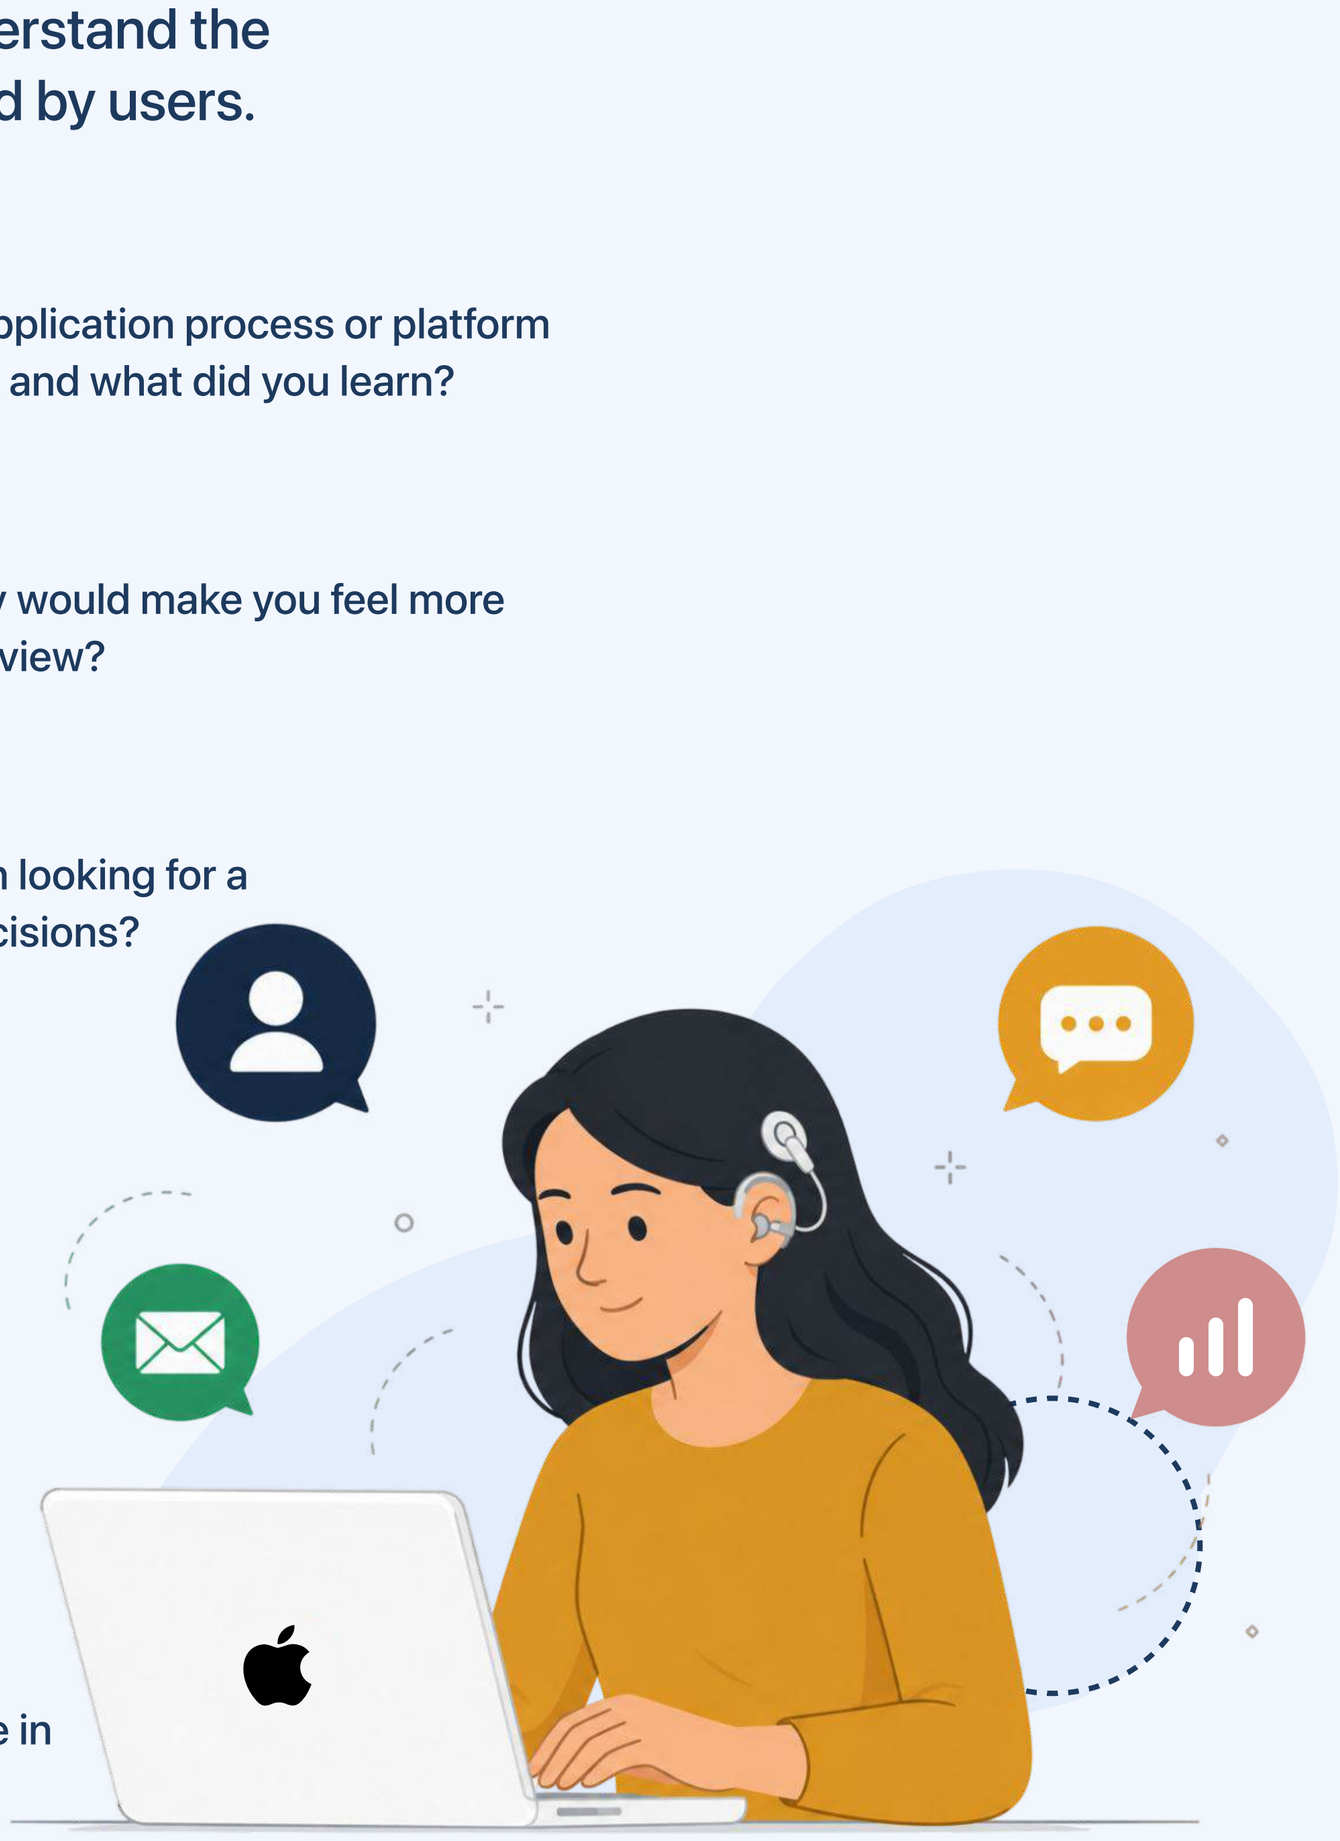
02 What information about a company would make you feel more confident before attending an interview?

03 What is your biggest concern when looking for a job, and how does it affect your decisions?

04 What currently prevents you from finding a suitable job?

05 When reviewing an employment contract, which clause is most important to protect your rights?

06 What features would you like to see in an ideal employment platform?



9 Personas

Samir Karam, 32

Digital Marketing Specialist.

Overview:

Samir is an Egyptian digital marketer who faces workplace rejection and stereotypes. Despite infrastructure challenges, he leverages professional networks to find jobs, striving to prove his competence in a fair, accessible, and remote-friendly work environment.

🎯 Goals

- Skill-based hiring, not pity.
- Flexible or remote work.
- Real social impact.
- Prove disability success.
- Empower disabled peers.

😩 Frustrations

- Inaccessible office infrastructure.
- Token hiring for quotas.
- Few specialized job platforms.
- Social stereotypes.
- Unclear company readiness

💪 Needs

- Clear info on office accessibility.
- Real roles, not token hiring for quotas.
- Job platforms tailored for different disabilities.
- Transparent job descriptions and expectations.
- Collaborative environment that respects his skills

🔥 Motivations

- Demonstrating his true professional potential.
- Achieving financial and career independence.
- Making a positive impact on society.
- Building a fair and inclusive workforce.
- Helping other disabled peers find opportunities.

🧠 Behavior

- Uses job platforms like LinkedIn and Wuzzuf.
- Depends on professional networking and recommendations.
- Reads job descriptions carefully before applying.
- Focuses on flexible or remote work options.
- Joins initiatives that support social inclusion

> "I don’t need a job out of pity, but a real opportunity where I am evaluated based on my skills."

Ahmed Samy, 29

Currently in unstable jobs

Overview:

Ahmed is a person with disabilities looking for a stable job in an environment that respects his abilities. Facing uncertainties about company readiness and suitability, he has become cautious and prefers employers who clearly state their support for people with disabilities

🎯 Goals

- Find a stable job respecting his abilities.
- Work in a supportive company environment.
- Know clear job details before applying.
- Competence-based hiring, not personal condition.

😩 Frustrations

- Rejection based on condition, not skills.
- Hidden or unsuitable workplace environments.
- Pity or embarrassing interview situations.
- Platforms ignoring disabled users' needs

💪 Needs

- Platform showing disability-supportive companies.
- Clear info on salary, hours, and insurance.
- Knowing if work environment is flexible/ suitable.
- Easy, uncomplicated application process.

🔥 Motivations

- Prove competence and ability to work.
- Achieve financial independence and job stability.
- Work in a respected and appreciated place.
- Find a supportive, understanding environment.

🧠 Behavior

- Hesitates to apply due to fear of rejection.
- Prefers jobs explicitly stating disability support.
- Relies on recommendations from acquaintances.
- Reviews job details carefully before applying.

> "I don’t need a job out of pity, but a real opportunity where I am evaluated based on my skills."

10 Empathy map

SAMIR KARAM

SAYS

- Skills, Not Pity: Wants fair evaluation based on expertise, not sympathy.
- Remote/Hybrid Preference: Prefers flexible models to bypass poor physical infrastructure.
- Flawed Platforms: Criticizes current disability recruitment platforms for lacking results.

THINKS

- Genuine Openness: Doubts if companies are truly inclusive and ready for his needs.
- Assessment Bias: Worries about being judged by his condition rather than his competence.
- Job Security: Questions the long-term stability and security of available roles.

DOES

- Uses Mainstream Apps: Checks LinkedIn and Wuzzuf for quality jobs.
- Screens for Remote: Meticulously reviews job descriptions for remote keywords.
- Vets Accessibility: Directly asks employers about physical accessibility during interviews.
- Workforce Advocacy: Participates in initiatives supporting inclusion for disabled individuals.

FEELS

- Frustrated: Disappointed by past job search experiences.
- Worried: Anxious about facing awkward situations during application processes.
- Determined: Highly motivated to prove his unique capabilities.
- Hopeful: Optimistic about finding a respectful,

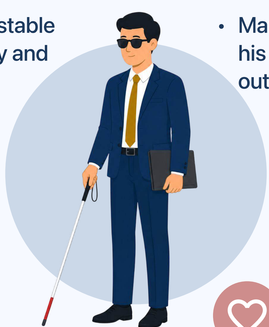
AHMED SAMY

SAYS

- Clear Options: Needs straightforward opportunities without complexity or exploitation.
- Verification Needed: Wants to verify if a job post is legitimate and safe.
- Financial Security: Desires a stable income for long-term security and independence.

THINKS

- Value Over Disability: Doubts if employers will value skills rather than focus on visual impairment.
- Interface Barriers: Feels capable but hindered by complex platform interfaces.
- Market Competition: Questions if his experience is enough to stand out in a competitive market.



DOES

- Careful Reading: Thoroughly reviews job descriptions before applying.
- Hesitant Applying: Sometimes hesitates to apply due to fear of rejection.
- Targeted Search: Searches specifically for companies stating support for disabilities.
- Network Reliance: Occasionally depends on recommendations from friends or connections.

FEELS

- Frustrated: Disappointed by previous job search experiences.
- Worried: Anxious about facing awkward situations during applications.
- Determined: Highly motivated to prove his competence and capabilities.
- Hopeful: Optimistic about finding a respectful and supportive workplace.

11 Journey Map

Persona: Ahmed Samy

Scenario: Ahmed Samy (35): Disabled job seeker looking for a stable, supportive role. Prefers inclusive companies offering full transparency on duties, salary, and work conditions.

Stage	Awarness	consideration	Apply	Decision	Post-Decision
User Action	Discovers job opportunities through job platforms or recommendations	Reads job descriptions carefully to understand the requirements and work conditions	Prepares his CV and applies for the job	Attends an interview or communicates with the HR team	Starts working or continues searching for better opportunities.
Touchpoints	Job platforms – Social media – Friends' recommendations	Job description – Company website – Employee reviews	Application platforms – Email – CV submission	Interview (online or in person) – HR communic ation	HR emails – Follow-up messages
Emotions					Painpoint	Difficulty knowing which companies support people with disabilities	Lack of clear information about workplace accessibility	Fear of being rejected because of his condition.	Uncomforta ble situations or pity during interviews.	Lack of feedback after applying.
solution	A platform that highlights disability-friendly companies.	Clear information about salary, work conditions, and accessibility.	Simple and accessible application process.	Inclusive hiring practices and respectful communication.	Application tracking and feedback system.

Persona: Samir Karam

Scenario ;Samir Karam: Disabled marketer seeking fair, skill-based roles. He looks for companies with accessible and flexible work environments.

Stage	Awarness	consideration	Apply	Decision	Post-Decision
User Action	Discovers job opportunities through LinkedIn, Wuzzuf, or recommendations from friends.	Reads job descriptions and checks company requirements and work environment.	Prepares his CV and applies for the job.	Attends an interview or communicates with the company.	Waits for the response or starts the job.
Touchpoints	LinkedIn – Wuzzuf – Professional network.	Job descriptions – Company website – Employee reviews.	Job platforms – Email.	Online or in-person interview.	HR email or company communica tion.
Emotions					Painpoint	Difficulty finding job opportunities suitable for people with disabilities.	Unclear information about workplace accessibility.	Fear of rejection because of disability.	Some companies lack accessible infrastructure No response from.	companies after applying.
solution	A trusted platform that highlights jobs for people with disabilities.	Clear information about workplace accessibility.	Simple and accessible application process.	Inclusive companies with flexible work options.	Application tracking and feedback system.

18 Testing

Task	Create an Account & Set Accessibility Preferences	Search & Filter Jobs by Accessibility Features	Apply for a Job & Upload CV	Build / Edit Professional Profile & Skills	Track Job Application Status & Messages
Goal	Create an account and specify accessibility preferences (type of disability).	Search and filter jobs based on availability features.	Applying for a job and successfully uploading a resume.	Building and modifying the profile and skills (Skills-First).	Track the order status and read messages from companies.
Category	Onboarding	Job Hunting	Application	Profile Management	Communication
Estimated Time	2 mins	3 mins	1.5 mins	4 mins	1 min
User Time	2 mins	2 mins	1 mins	5 mins	1.5 mins
Success	Success	Success	Success	Success	-
Success Rate	5/5	5/5	5/5	4/5	4/5
Observation	Visual onboarding steps were clear and completely free of distracting cognitive clutter	Found jobs supporting deaf and hard-of-hearing applicants with absolute ease.	The 1-click apply feature worked flawlessly and quickly.	Experienced minor confusion interpreting text descriptions for advanced technical terms.	Navigated to messages but felt anxious about potential phone call requests from recruiters.
Problem	-	-	-	Lack of supportive visual icons alongside complex text descriptions.	No clear indicator that the employer communications will be text-only/ sign-language supported.
Critical Or Not?	-	Critical	Critical	-	Critical
UX Team Recommendations	-	-	-	Integrate visual cues or icons next to advanced tech labels to aid comprehension.	Add a "Text Chat Only" or "Sign Language Supported" tag inside the application tracking view.
User Recommendations	Very clean layout and easy on the eyes.	The filtering system is direct and straightforward.	The application step was perfect and fast.	Adding simple icons or hover tooltips for skills would make it much better.	I need to be 100% sure the company won't try to call me via voice, text-only communication is crucial.

Task	Create an Account & Set Accessibility Preferences	Search & Filter Jobs by Accessibility Features	Apply for a Job & Upload CV	Build / Edit Professional Profile & Skills	Track Job Application Status & Messages
Goal	Create an account and specify accessibility preferences (type of disability).	Search and filter jobs based on availability features.	Applying for a job and successfully uploading a resume.	Building and modifying the profile and skills (Skills-First).	Track the order status and read messages from companies.
Category	Onboarding	Job Hunting	Application	Profile Management	Communication
Estimated Time	2 mins	3 mins	1.5 mins	4 mins	1 min
User Time	1.5 mins	2.5 mins	4 mins	3 mins	45 secs
Success	Success	Success	Success	Success	-
Success Rate	5/5	5/5	4/5	5/5	5/5
Observation	Registered quickly and selected his disability type smoothly from the options	Successfully used the "Accessibility Features" filter to find wheelchair-accessible workplaces	Struggled to upload his CV from his mobile device due to responsive layout sizing	Completed his profile using the "Skills-First" approach with no issues	The dashboard tracking system was clear and very easy to read
Problem	-	-	The upload form area felt restricted and unoptimized for mobile touch targets	-	-
Critical Or Not?	-	Critical	Critical	-	-
UX Team Recommendations	-	Keep the accessibility data updated on the backend	Optimize the upload container size and support direct integration with Google Drive/Files	-	-
User Recommendations	It would be great to allow selecting multiple disabilities for users with concurrent conditions.	This filter is amazing, it saved me so much research time.	The upload button is too small on mobile, making it hard to tap confidently.	The Skills-First concept is brilliant.	I wish I could get an instant notification as soon as the status changes.

Task	Create an Account & Set Accessibility Preferences	Search & Filter Jobs by Accessibility Features	Apply for a Job & Upload CV	Build / Edit Professional Profile & Skills	Track Job Application Status & Messages
Goal	Create an account and specify accessibility preferences (type of disability).	Search and filter jobs based on availability features.	Applying for a job and successfully uploading a resume.	Building and modifying the profile and skills (Skills-First).	Track the order status and read messages from companies.
Category	Onboarding	Job Hunting	Application	Profile Management	Communication
Estimated Time	2 mins	3 mins	1.5 mins	4 mins	1 min
User Time	4 mins	6 mins	2 mins	7 mins	3 mins
Success	Success	Success	Success	Success	-
Success Rate	4/5	3/5	5/5	3/5	2/5
Observation	The screen reader read the form, but color contrast on some input borders was weak.	Filtering took too long because the screen reader didn't announce active vs inactive filter states.	Successfully uploaded the file with the help of proper screen reader guidance.	Had a hard time typing skills because the auto-complete dropdown wasn't fully accessible.	Got lost in the dashboard and couldn't locate new unread messages from employers.
Problem	-	Filter buttons lack clear status announcements for assistive tech.	-	The skills dropdown menu is completely missing accessible text tags for screen reader navigation.	The messages icon lacks a distinct high-contrast visual badge count and screen reader text notification.
Critical Or Not?	-	Critical	Critical	Critical	Critical
UX Team Recommendations	-	-	-	-	-
User Recommendations	Text fonts need to stay sharp and readable when scaled up.	I couldn't tell if the filter was actually applied or not without checking the job list text manually.	The steps here were direct and easy to follow.	The list glitches out and prevents me from selecting my skill easily with my reader.	-

19 Outcome

85%

Better Job Matching

Users can find job opportunities that better match their skills, preferences, and accessibility needs

89%

Improved User Experience

A simpler and more intuitive experience helped users complete tasks with less effort and confusion

92%

Inclusive & Accessible Platform

The platform was designed to support people with disabilities through inclusive and accessible design principles.

ADAHA is making a real impact in proplr's lives.
